This is outrageous!! There is nothing wrong with XM and other satellite radio servers to offer traffic and weather. At this time of year when serve thunderstorms and toradoes are a constant threat, it's nice to know that as a PAID subscriber to this service, I have another outlet to turn to get the latest information on weather.

It is ridiculous that NAB can tell me what I can and can't listen to, especially if I am paying for it. It's my money and my right to make that decision, not theirs and not yours. Please disregard the NAB's petition 04-160 and kindly remind them that I will be voting in the upcoming election and my vote will not be going to the man that chooses to take my rights, but to the man who will work to protect my rights!!!
